The Minnesota Sexuality Education Resource Review Panel **Recommends the use of this flip chart for the following reasons:**

This flip chart is designed as a teaching tool to educate 9-12th graders about birth control. This resource contains a lot of technical information, most of which is accurate and up-to-date. It does contain some information, however, that is not current (e.g., Norplant, spermicide use related to HIV/STDs). The educator using the flip chart will need to update the information presented as knowledge and technology changes.

The information on the flip chart is presented in Spanish and English. The reviewers were all non-Spanish speaking individuals so they could not comment on the Spanish language portion.
