

Provider Summit on Young Gay/Bi Men & HIV

“Addressing the Alarming Increase of HIV Infection Rates
Among Young Gay/Bi/Unidentified MSM in Minnesota”

*HIV infection rates among
young gay/bi men ages 13-24
have nearly doubled in the last
year and are the highest
they've been since 1986!*

We need your help to identify
new messages and programs
to reach these youth.

Please encourage other youth
providers to attend.
